

# Software for the Future of Grocery Retail

ThriVersA, LOC's next-generation software unifies the front-of-store, back office, and headquarters, enabling seamless data sharing for easier management. Hardware-agnostic LOC also allows you to use our software on any device to create robust mobile point of sale (POS), customer-friendly self-service, and efficient checkout solutions.

## Digitally Transform Your Operations, Your Way

LOC's ThriVersA suite suite of software modules allows you to create the tech stack with the features you need to enhance customer experiences, build loyalty, and increase operational efficiency.

### Loyalty

ThriVersA Loyalty is the most flexible solution available, supporting more than 35 different rewards program options and integrating with third-party programs for fuel discounts.

### Mobile

Empower staff with line-busting capabilities to provide on-the-spot service. ThriVersA Mobile also allows you to streamline inventory management, ordering and DSD receiving, and label printing.

### Self-Service

Save time for deli or prepared foods staff with a solution that communicates orders directly to kitchen prep areas. Kiosks can also manage loyalty program sign-ups.

## Keeping Pace in a Dynamic Market

*"We have started to take advantage of LOC's latest eSuite offer, which will lead us to the next level. We can streamline processes and get the data we need, more importantly, when we need it. In this fast-moving market, we need the ability to make decisions quickly, and our reporting tools with eSuite empower our team."*

— Joe Parisi, President and COO of New York, Food Group

# What Sets LOC Apart

The heart of LOC's design is accessible data necessary to operate profitably and competitively. Our design reflects decades of experience in the grocery industry, digitalizing best practices and business logic to optimize operations.

## System Setup

Whether a grocer manages one store or 500+ stores, LOC enables setup across all lanes to ensure consistency and conformity. LOC provides control of button configurations, peripheral and terminal settings.

## 500+ Function Point of Sale Software

LOC's nationwide team of resellers with extensive experience in the grocery space assist grocers in configuring their systems to make the functionality they need easily accessible to employees and customers.

## Data Tables and Data Exchange

Easily configure tables and control where data resides. Manage system tables by store and terminal from headquarters. LOC monitors data in transit, quickly detecting data that has not flowed by store and date.

## Browser-Based Software

LOC ThriVersA is browser-based, freeing IT administrators from the client-server deployment model. Delivery via a web browser drastically reduces the amount of IT hardware required onsite, decreasing maintenance costs.

## Enterprise Management

LOC runs directly from the cloud, facilitating centralized management. Managers can purchase for all stores and manage inventory. Easy access to enterprise data gives managers visibility into revenues, costs, and profits.
