

# The Only Store Management Software Specialty Retailers Need

Competing on customer experience is vital in the digital age, and specialty retailers need the right technology to capture and maintain market share. LOC Software offers retailers a flexible store management system that allows them to differentiate their businesses with unique, customer-pleasing experiences. LOC is also designed for operational efficiency, streamlining workflows in companies with one or 500+ stores.

## Software Tailored to Every Detail of Specialty Retail Operations

LOC's ThriVersA suite of software modules allows specialty retailers to digitally transform manual workflows and meet consumers' expectations for convenience and personalization.

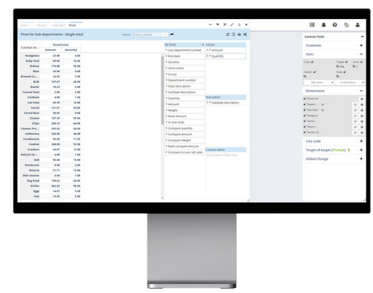

### POS

ThriVersA POS, the browser-based, hardware-agnostic version of LOC point of sale software, enables transactions from any device to create the best user experiences.

### Supply Chain

Scalable ThriVersA Supply Chain gives stores visibility from ordering to customer sales, enabling smart management and purchasing decisions and minimizing shrink.

### Back Office Solutions

LOC back office solutions give specialty retail managers centralized control of data and communications across their entire operation or enterprise.

## Keeping Pace in a Dynamic Market

*"Working with LOC Software has moved us forward in many of our technology needs."*

— Ben's Supercenter

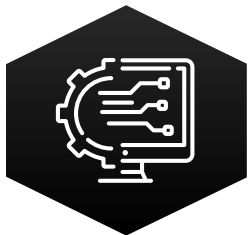

# What Sets LOC Apart

LOC's mission is to optimize retail performance. We achieve this by providing our customers with access to data and increasing operational efficiency.

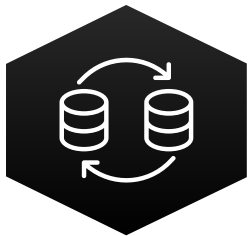

## System Setup

From a single location, specialty retailers can easily set up screens, button configurations, and peripherals for employees in different roles across the organization.

## 500+ Function Point of Sale Software

LOC never locks specialty retailers into changing how they do business to use our software. Our feature-rich software enables any type of transaction necessary.

## Data Tables and Data Exchange

LOC gives retailers control over where data resides and how to configure reports. Managers can arrange system tables by store or even by POS terminal.

## Browser-Based Software

LOC replaces client-server deployment with a browser-based model, enabling easier deployment and management and lowering costs.

## Enterprise Management

Cloud deployment and centralized control make it easy to purchase, track inventory movement, and monitor profitability for all locations in a multi-store operation.
